

Work Plan

Work Package number (WPn)

WP1: The WP 1 will set the ground for the proper control, management and coordination of overall activities and goals of the project in work packages 2,3,4,5,6.

WP2: Need analysis, requirements and stakeholder dialogue

Cooperation among partner organisations first initiated as part of this WP. The following tasks will enhance partner dialogue in EU and LAC for Turning ICT usage into economic and social benefits.

WP3: Design and Implementation of the Technological Environment as a solution to the problems identified in the state of the art: Open Source Learning Environment based on the Blockchain, global sharing pedagogy, flipped learning and personalized learning will be implemented to support teachers in delivering lessons to the groups identified. The project will implement an open educational environment, train teachers to use the platform, and then the teachers will in turn teach the students.

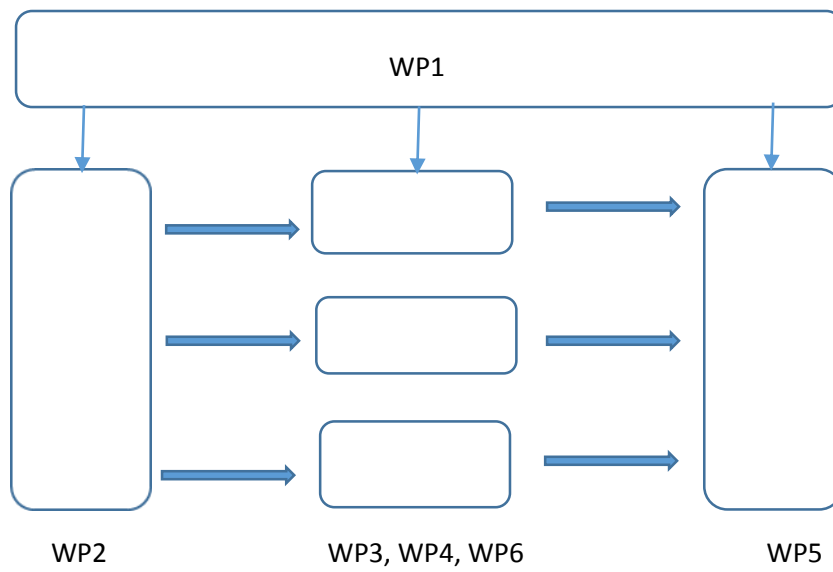

WP4: Development and implementation of the pedagogical aspects and knowledge transfer to the teachers: Development of all the pedagogical components such as course content, instructional materials, and course evaluation for the pilot courses in the project.

WP5: Dissemination and Exploitation. Dissemination is organised at the overall project level, as well as at the level of the individual participating partners. Plans for scientific publications and conferences - which are the main emphasis of the dissemination activities of the project – are here presented.

WP6: Small-Scale Validation and Pilot Studies. The focus is on conducting a real-life evaluation of the digital learning environment through small-scale validation by the teachers and trainers. The aim is to ensure that the knowledge transfer in WP4 is successful and the target group is able to extend the knowledge to the original beneficiaries.

Structure and staging of the WPs:

The WP 1 will set the ground for the proper control, management and coordination of overall activities and goals of the project in work packages 2,3,4,5,6. The needs, requirement, challenges of learning and exclusion, and relevant actors are identified in WP2. Relevant solutions with ICT would be identified as well. WP3 will focus on the development of the digital learning system to support the solutions identified in WP2, and WP4 will develop the pedagogies and transfer knowledge to teachers. Dissemination and exploitation actions are conducted in WP5, while WP6 will conduct validation of the solution on the target beneficiaries.

Structure and staging of the WPs
